

Note: No course outline for this subject was given to us, so here is one we made ourselves according to what we were taught.

COURSE OUTLINE

Course:	IT in Business Lab	Course Code:	CL1001
----------------	--------------------	---------------------	--------

COURSE DESCRIPTION

This lab component is heavily focused on practical, hands-on mastery of productivity suites, particularly Microsoft Excel.

COURSE CONTENTS

TOPIC AREA	CONTENTS
Operating Systems and Cloud Basics	File management, navigating basic OS environments, understanding cloud storage (Google Drive, OneDrive), and collaboration tools.
Advanced Word Processing (MS Word)	Document formatting, styles and themes, inserting tables and graphics, automated table of contents, citations, and mail merge for business letters.
Spreadsheet Fundamentals (MS Excel)	Data entry, basic arithmetic operations, cell referencing (relative and absolute), formatting, and basic data sorting/filtering.
Intermediate Excel & Formulas	Using built-in functions (statistical, mathematical, date/time), logical functions (IF, AND, OR), and basic financial functions (PMT, PV, FV).
Data Analysis & Visualization (MS Excel)	Creating and modifying charts (pie, bar, line), conditional formatting, PivotTables, and PivotCharts to summarize business data.
Professional Presentations (MS PowerPoint)	Slide design principles, using slide masters, integrating charts/tables from Excel, adding professional transitions and animations.
