English II (SS1006)

Sessional-II Exam

Date: April 9, 2026

Program: BBA/BSBA/BSAF/BFT

Course Instructor(s):

Dr. Zahida Mansoor	Ms. Mahnoor Chaudhry
Dr. Iram Amjad	Ms. Rubab Arshad
Dr. Kalsoom Jahan	Ms. Uzma Safdar
Dr. Saadia Rasheed	Ms. Halima Altaf
Ms. Hajra Ikraam	Ms. Huma Asif
Ms. Namra Fazal	Ms. Areeba Nadeem
Mr. Razm ul Zafar	Ms. Zoha Haseeb
Ms. Zainab Mubarik	Ms. Ayesha Imtiaz
Ms. Aqsa Naz	Ms. Rafia Dastagir
Ms. Zakia Naeem

Instructions: Attempt all questions in the order given on the provided Answer Sheet only.

Question No.1

(CLO No. 5)

Marks: 17

Q1: Read the case study carefully and answer the questions given at the end.

A regional healthcare company forms a six-member team of Ali Raza (finance officer), Sana Malik (HR coordinator), Usman Tariq (IT specialist), Bilal Ahmed (operations manager), Hina Sheikh (communications lead), and Farooq Khan (compliance officer) to design a new employee wellness program in ten weeks.

At first, members are polite but guarded, depend on the team lead for nearly every decision, and hold back from sharing strong views. As the project moves forward, the team finds itself caught in a web of overlapping difficulties. No one has clearly defined what the wellness program is actually meant to achieve, and without a shared target, every conversation pulls in a different direction. Usman and Bilal clash repeatedly; Usman pushes hard for a fully digital rollout, while Bilal argues that not all staff have equal access to technology. Because no common criteria exist against which to evaluate either position, the debate stalls rather than progresses. At the same time, Farooq grows resentful of Hina, feeling that her suggestions are approved without proper scrutiny because of her seniority. Ideas are accepted or rejected based on who proposes them rather than on their actual merit, and no structured space exists for alternatives to be freely explored. Side conversations multiply, and members begin agreeing with popular ideas rather than raising real concerns. The root of the problem is clear: the team has been attempting to make decisions without first agreeing on what problem they are solving, what success looks like, or how competing ideas should be fairly assessed. The team lead responds by restructuring meetings and assigning Sana the specific task of questioning every proposal before a vote is taken. The team lead also established a clear procedural framework: agenda items were circulated before each meeting, speaking turns were regulated, and a formal mid-course review was scheduled at Week 6 to assess progress against the original plan.

Task role → opinion and information analyzer

Having moved past the interpersonal friction and process-related gaps, the team channels its energy into collaborative problem-solving, following a structured process to reach a well-grounded decision. They begin by articulating the exact problem they are trying to solve, bringing every member to a shared understanding of the challenge rather than assuming alignment. From there, they establish clear, measurable targets that any viable solution must meet, ensuring that future decisions rest on agreed-upon standards rather than personal preference. Only once those benchmarks are in place do they move to generating ideas, doing so openly and without judgment so that every possibility receives fair consideration. Each option is then systematically tested against the established targets, allowing the team to assess proposals on their merits rather than on the influence of whoever raised them. Through this process, a final plan takes shape that every member can stand behind.

The structured roles and built-in review points established earlier prove their worth by Week 8, and the team is working seamlessly. Each member carries a defined responsibility, and the mid-course check conducted two weeks before the deadline allows the team to make timely adjustments before the final push. They present their work to senior leadership as a panel, with Ali, Sana, Usman, Bilal, Hina, and Farooq, each covering one segment. The project closes with a formal review where the team reflects openly on both what went well and what they would improve.

Questions

pseudo-conflict personality conflict
Issue-related
cultural

i. Two distinct types of group conflict appear in this case. Identify each type, and suggest specific strategies to resolve them with reference to the scenario. (4 Marks)

ii. Identify one task role and one maintenance role that were critical in this case and explain how each helped the group move forward. (4 Marks)

Gatekeeper
Agenda setter

iii. Identify one procedural role performed by a team member and explain why it was important for keeping the group on track towards a successful outcome. (3 Marks)

iv. The team follows a step-by-step approach to resolve their challenge. Identify the six steps of the process for conflict resolution with examples to support your answer. (6 Marks)

- Identify the problem
- evaluate the problem
- look for solution criteria, look for solutions
- implement the solutions
- Assess the solutions

Question No.2

(CLO No. 2)

Marks: 8

~~Q2:~~ Answer the following question.

Listening plays a vital role in enhancing communication skills. Explain the four types of listening in detail, providing suitable examples for each.

Action-oriented -> final result
Content oriented -> content (logic, facts)
people oriented -> empathy
time oriented -> time
