Do not write below this line

Attempt all the questions.

CLO #2: Explain the features of e-business and identify the prevailing methods of e-business development. Learn how to develop a fully functional website.

Q1: What's the difference between B2B and C2C e-commerce, and can you give one example of each? [2marks]

Q2: Which ecommerce success factor do you think most influences a customer's first impression of an online store? Why? [2marks]

CLO #3 Develop an understanding of Data Science focusing primarily on database management systems and explore different tools practically available for Data Science. Learn to utilize Microsoft Access for database management and Tableau for data visualization.

Q3: Consider the following table representing a database for Employees. Each row in the table represents employee data.

Table: Employee

Book ID	Title	Author	Genre	Publisher ID
1	To Kill a Mockingbird	Harper Lee	Fiction	101
2	Lord of the Rings	J.R.R Tolkien	Fantasy	102
3	Harry Potter	J.K Rowling	Fantasy	103
4	The Great Gatsby	F. Scott Fitzgerald	Fiction	104

For the given table, please answer the following questions:

- Identify the fields in the table. [2marks]
- Which database structure is this, and what is the reason behind choosing it? [2marks]

CLO #2: Explain the features of e-business and identify the prevailing methods of e-business development. Learn how to develop a fully functional website.

Q4: You've just been hired to lead the launch of a new online retail platform. The company wants to offer smooth, personalized shopping experience and ensure that all internal processes from order placement to delivery run efficiently.

As part of the planning team, you're asked to focus on two key architecture components:

1. Profiling and Personalization
2. Workflow Management

Question:

Explain why these two components are important for the success of the e-commerce platform.

[6 marks]

Q5: Scenario:

Two companies from the fashion industry have decided to collaborate:

- One company operates entirely online, selling trendy apparel through its digital platform. It uses customer data to personalize shopping experiences and has no physical stores.
- The other company runs a chain of physical retail outlets across the country. It has a basic online presence but relies mostly on in-store sales.

They agree to work together. The online company will feature some of the retail company's products on its website, while the retail company will showcase the online brand's items in select stores. They'll also share marketing efforts and customer insights to boost sales across both channels.

Questions:

1. What type of "Clicks and Bricks" strategy or Digital Presence is being used, and how integrated is the e-commerce component? [4marks]
2. What are the benefits and challenges of this approach? [2 marks]
